Overview

The Update Item Selling Price Plugin is a specialized plugin tool that was created for AutoCount Accounting to assist business and organization in updating selling price automatically. This plugin is particularly useful for companies that want to update their cost and selling price for a large number of products. Below are some of the features of this plugin.

System Requirements

- AutoCount Accounting 2.0 Basic Above
- UDF Module
- Valid for One Account Book Only

Set as Auto or Manual

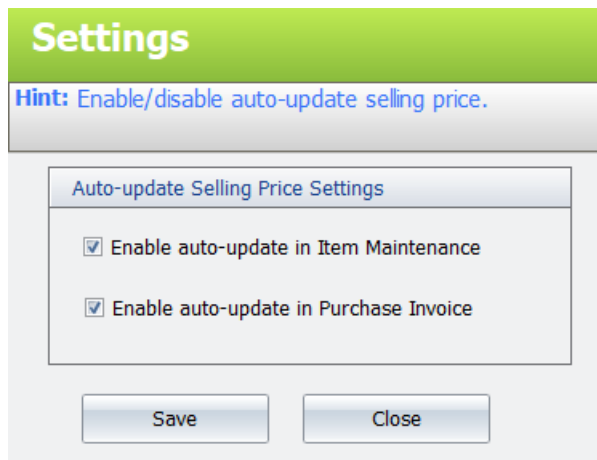

Figure 3 Set as Auto/ Manual

This is a feature that can let the user set the update selling price in auto mode or manual mode. The user needs to go to item maintenance to configure the settings.

Update Item Selling Price Plugin

The screenshot shows the 'Edit Stock Item' window in AutoCount Accounting (Ver: 2.0). The window title is 'Edit Stock Item - [003] - omni [2.0] - AutoCount Accounting (Ver: 2.0)'. The main area is divided into several sections:

- Item Section:** Contains fields for Item Code (003), Description (samsung s23), Total Balance Qty (9), Lead Time, Duty Rate (%), Supply Tax Code, Purchase Tax Code, and Tariff Code.
- Analysis Code Section:** Contains fields for Item Group and Item Type.
- Active Section:** Contains checkboxes for Active (checked), Has Promoter, Discontinued, and Back Order Control (checked).
- Costing Method Section:** Contains a dropdown for Costing Method (Weighted Average), a field for Main Supplier, and a checked checkbox for Stock Control.
- Details Section:** Contains tabs for Replacement Item, Image, Further Description, External Link, and Note. The 'UOM' field is set to 'unit'.
- User Defined Field Section:** Contains a table with the following data:

UOM Details	Alternative Item Code	Others	User Defined Field
Price1 MarkupAmt			5.00
Price2 MarkdownAmt			2.00
Price3 MarkdownAmt			6.00
Price4 MarkdownAmt			5.00
Price5 MarkdownAmt			6.00
Price6 MarkdownAmt			3.00

At the bottom right of the window, there are 'OK' and 'Cancel' buttons.

Figure 4 Setup in Item Maintenance

In the Item Maintenance page > User Defined Field section. User can type the amount of the markup and markdown in respective column. After that, save the settings.

When the user is restocking using Purchase Invoice, the cost price will auto update to the cost in Item Maintenance. Then, all the selling prices will be auto updated according to the markup and markdown setting set by the user.
